01 / BRAND DIRECTION

A product-first identity

A light, spacious and credible design language for the Khanvex app publishing website.

khanvex.tech

Apps for better everyday experiences.

Thoughtfully designed mobile apps built around real needs.

Design principles

01 Product-led

Real app screens and store links lead every page.

02 Clarity first

Short, confident copy with generous breathing room.

03 One identity

Blue, white and neutral surfaces unite the portfolio.

04 Purposeful polish

Refined details, without decoration for its own sake.

Brand rules

Use only the light theme. Keep the primary brand blue consistent across navigation, buttons, links and highlights. Let each app retain its own personality inside screenshots and limited decorative accents.

Light only

Professional

Product-focused

Accessible

02 / VISUAL FOUNDATIONS

Color & typography

A controlled palette inspired by the supplied blue reference. Values are the proposed Khanvex tokens.

Brand palette

Primary blue
#588BF8

Blue hover
#4F84F8

Blue soft
#A4C1FB

Blue tint
#EBF1FF

Surfaces & neutrals

White surface
#FFFFFF

Page background
#F8FAFD

Section blue
#F4F8FF

Heading text
#15233B

Body text
#5C6B82

Muted text
#8A97AA

Border
#E6ECF5

Success
#20C997

Type scale

Aa

Plus Jakarta Sans

Primary font for headings, body and controls. Use variable or licensed webfont files with sensible system fallbacks.

Display / H1	52–60 px	600–700
Section / H2	36–42 px	600–700
Subhead / H3	24–28 px	600–700
Body	16 px	400–500
Caption / UI	14 px	400–600

03 / INTERFACE RULES

Layout & components

Consistent geometry, clear spacing and subtle motion make every Khanvex page feel related.

Layout specifications

Desktop content width	Up to 1280 px
Reading width	Up to 768 px
Section padding, desktop	96–120 px
Section padding, mobile	64–80 px
Spacing increments	8 / 12 / 16 / 24 / 32 / 48 / 64 px

Buttons & surfaces

Explore our apps

Learn more

Soft section surface
#F4F8FF

Product card

White background, subtle border, 20–24 px radius and restrained shadow.

Visual hierarchy

One clear heading, concise support copy and a single leading action.

Interactions & motion

Use short opacity and translate transitions, understated card hover states and consistent focus rings. Respect reduced-motion preferences. Avoid heavy parallax, bouncing elements and auto-playing distractions.

Accessibility essentials

Use semantic headings, keyboard-accessible controls, descriptive image text and clear link labels. Check text and button contrast against WCAG AA; the bright primary blue may need a deeper accessible variant for small white text.

04 / EXPERIENCE BLUEPRINT

Pages & delivery rules

A reusable Next.js system for an expanding collection of apps on khanvex.tech.

Homepage composition

01	**Navigation**	Logo, Apps, About, Support, Contact
02	**Hero**	Strong promise, concise copy, clear app CTA
03	**Featured apps**	Alternating product screenshots and benefits
04	**Why Khanvex**	Three or four truthful product principles
05	**Closing CTA**	Discover apps and contact support
06	**Footer**	Company, store, support and legal links

App detail page template

/apps/[slug]

Hero with app icon, promise, actual screenshots and official store buttons. Then feature blocks, benefits, screenshots, genuine FAQs, privacy and support links, and a final download CTA.

Legal & content architecture

/apps	All published products
/apps/[slug]/privacy-policy	App-specific disclosures where required
/privacy-policy	Company-wide disclosures covering listed apps
/apps/[slug]/delete-account	External deletion route for applicable apps
/support / /contact	Help and publisher contact details

Implementation checklist

Next.js App Router + Vercel + Cloudflare DNS. Maintain a typed app registry, responsive image assets, unique app metadata, canonical URLs, sitemap, Open Graph previews, real store links, working support paths and verified legal disclosures.
